

VARIATION OF TEEN PATTI GAME : FLIPPER

1. Introduction

Flipper, a variation of Teen Patti is highly popular amongst high stake players in casinos. In this variation, three Jokers are dealt and kept in the centre of the table similar to Zhandu.

These three Jokers are variable Jokers. After dealing the cards and the three variable Jokers, an additional fixed fourth Joker is also taken out by the dealer from the mid of the remaining pack of cards.

All the four Jokers are opened face up immediately after collection of Boot money.

2. Variable Jokers

Whenever any player folds his cards, the Jokers at the centre of the table are removed and replaced by the folded cards. The old Jokers become invalid and the new folded cards become the new valid Jokers. The fourth fixed Joker remains unchanged. The three new Jokers become applicable to all the players instantly. This process of replacement of three variable Jokers is repeated upon folding of cards by any player at any time.

3. Side Show

Side Show can be requested only after all the players are Seen and player requesting for Side Show has made at least one Seen move.

4. All-In Move

All-In move is automatically converted in to Side-Show with the player on left hand side, even if none of the player is a Seen player. It is not mandatory that the player on left hand side is a Seen player or All-In player is a Seen player. If player on left hand side is Blind / Counter, then he has to see his cards because of forced Side Show and the same rule applies to All-In player also.

Upon Side Show, if All-In player loses, then his hand is folded and his cards are opened as new Jokers, replacing the existing Jokers. The process of Side Show is terminated at this stage. Player on the left hand side becomes a Seen player upon his next turn of move.

If player on the left hand side loses, then cards of player on left hand are opened as new Jokers, replacing the existing Jokers. But, the process of Side Show is not terminated at this stage. Further, cards of All-In player are forced into Side Show with the latest active player on his left hand side. This process of forced Side-Show is continued until either the All-In player loses or there remain only two players resulting in direct Show with him.

5. Applicability of Classical Teen Patti Rules

Apart from the rules described above, all the remaining rules and processes of classical Teen Patti are applicable Flipper.
